## SECTION 4 FIRST AID MEASURES

**EYE CONTACT:** Flush eyes with large amounts of water for two to three minutes. Remove any contact lenses and continue flushing for fifteen minutes.

**SKIN CONTACT:** Flush exposed areas with plenty of soap and water. Remove contaminated clothing, including shoes, and launder before reuse.

**INGESTION:** Rinse mouth and drink plenty of water. Do not induce vomiting; seek medical attention if discomfort persists.

**INHALATION:** Keep patient calm remove to fresh air.

## SECTION 5 FIRE FIGHTING MEASURES

**NFPA CODES:** HEALTH – 1  
FLAMMABILITY – 1  
REACTIVITY – 0  
SPECIAL – Not applicable.

**FLASHPOINT:** 236°C (DIN/EN 22719; ISO 2719).

**FLAMMABLE LIMITS:** Not determined.

**AUTOIGNITION TEMPERATURE:** 345°C (DIN 51794)

**GENERAL HAZARD:** Evacuate personnel upwind of fire to avoid inhalation of irritating and/or harmful fumes and smoke.

**EXTINGUISHING MEDIA:** Chemical type foam, carbon dioxide, dry chemical, water fog.

**HAZARDOUS COMBUSTION PRODUCTS:** Fumes, smoke, carbon dioxide and carbon monoxide.

**FIRE FIGHTING PROCEDURES:** Use water spray to cool fire exposed surfaces and to protect personnel. Shut off 'fuel' to fire. Use fire extinguishing materials listed above to extinguish fire.

**SPECIAL PRECAUTIONS:** Avoid spraying water directly into large containers due to danger of boilover.

**FIRE FIGHTING EQUIPMENT:** Respiratory and eye protection are required for fire fighting personnel. Full protective equipment (Bunker Gear) and self-contained breathing apparatus (SCBA) should be used for all indoor fires and any significant outdoor fires. For small outdoor fires, which may easily be extinguished with a portable fire extinguisher, use of an SCBA may not be required.

**STATIC DISCHARGE SENSITIVITY:** Not determined.

**IMPACT SENSITIVITY:** Material is not impact sensitive.

**NOTE:** For small containers of material, it should be considered if there will be less damage by allowing the material to burn to exhaustion rather than fighting the fire and risk causing environmental contamination and other problems. Collect contaminated extinguishing water separately, do not allow to reach sewage or effluent systems.

## SECTION 6 ACCIDENTAL RELEASE MEASURES

**LAND SPILL:** Wearing the appropriate personal protective equipment designated in SECTION 8, move the container, close or cap valves and/or block or plug hole leaking container and transfer to another container if safe to do so. Contain spilled liquid with sand or earth. Recover by pumping (use explosion proof equipment) or with a suitable absorbent. If liquid is too viscous for pumping, scrape up with shovels or pails and place in suitable containers for recycle or disposal. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

**WATER SPILL:** This material is lighter than water and will form an oily slick on the water. Notify port or relevant authority and keep public away. Shut off source if possible to do so without hazard. Confine if possible using absorbent booms or other suitable floating materials. Remove from surface by skimming or with suitable absorbents. If allowed by local authorities and environmental agencies sinking and/or suitable dispersants may be used in non-confined waters. Consult an expert on disposal of any recovered material and ensure conformity to local disposal regulations.

**GENERAL PROCEDURES:** Eliminate ignition sources, if possible, without causing unreasonable risk to people or the environment. Remove containers of strong oxidizers from the release area.

**RELEASE NOTES:** If spill could potentially enter any waterway, including intermittent dry creeks, contact the local authorities. If in the U.S., contact the U.S. Coast Guard National Response Center toll free at 800-424-8802.

In case of accident or road spill contact:  
ChemTrec in U.S.A. at 800-424-9300.  
CANUTEC in Canada at 613-996-6666.  
ChemTrec, other countries, at +1 202 483 7616.

**ADDITIONAL INFORMATION:** See SECTION 13 for disposal information and SECTION 15 for regulatory requirements. Large and small spills may have a broad definition depending on the user's handling system. Therefore, the spill category must be defined at the point of release by technically qualified personnel.

## SECTION 7 HANDLING AND STORAGE

**HANDLING:** Use appropriate personal protective equipment as specified in SECTION 8. Handle in a well ventilated area. Handle and use in a manner consistent with good industrial/manufacturing techniques and practices.

**STORAGE:** Store in unopened containers under cool, dry conditions. Do not store with, or close to oxidizers. Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. This material is not considered a static accumulator but use proper bonding and/or grounding procedures.

**ADDITIONAL INFORMATION:** Do not pressurize, cut, heat or weld containers. Empty product containers contain product residue. Do not reuse empty containers without commercial cleaning or reconditioning.
